

A record of a child's days, shared between two homes.

For the families who leave your office agreeing to cooperate, and then find that everything about the children's days still moves by text message. CoCoparent is the small tool that keeps the shared record, so the handoff has already happened before anyone opens a thread.

What it does

- **Logging in seconds** — meals, sleep, mood, medicine, hygiene, milestones and photos, per child.
- **One calendar** built from the custody schedule. Changing it takes both parents' agreement.
- **The handoff summary** goes to the other parent automatically at each changeover: the week at a glance, any medicine given, what was packed and what should come back, a photo, and anything the sending parent wants to add.
- **Trends** — sleep, mood and meals over weeks, so patterns are seen rather than argued.
- **Exports** for a doctor's visit or a monthly report.

Who it is for

Cooperative households: separated or divorced parents who share time and want to share in the children's days. Children of any age, each with their own record. iPhone, Android and the web; both parents on one subscription.

What it deliberately is not

- **No messaging.** A thread turns a record into a conversation; the parents already have a way to talk.
- **No tone monitoring, no expense ledger, no court features.** We make no claim of admissibility. Families in dispute are better served by the court-oriented products.
- **No analytics on the child.** No third-party tracking, no session recording; a profile is never built from a child's day.
- **Removal is a setting,** not a support ticket, and a family that has ever subscribed keeps its full history.

Price

Free for one child, indefinitely. Premium — every child, photos, notifications and exports — is **\$9.99 a month or \$79.99 a year for the family**, one subscription covering both parents. 14-day trial once the second parent joins.

An offer for the families you refer

Three months of Premium free, on us, for any family that comes to CoCoparent through your practice. The code is yours alone, and all we see is how many families used it. Hand this sheet over, or say the code aloud at the end of the last session.

One code per family. iPhone: App Store → your picture → Redeem Gift Card or Code, or the link we send with the code. Android: Play Store → your picture → Payments & subscriptions → Redeem code. Premium runs free for three months and then renews at the family price unless they cancel.
